

# TECNOMATIX PLANT SIMULATION

## Plant Simulation Basics Training

### Day 1

- **Introduction to simulation studies**
- **Modeling Assembly Lines and Buffers**
- **Failure Profiles**

### Day 2

- **Production Schedules**
- **Working with Table Files**
- **Data Types & User-defined Attributes**

### Day 3

- **Machine Setup Matrix and Planned/Unplanned Times**
- **Conveyor Attributes**
- **Tracks & Transporters & Transfer Station Object**

### Day 4

- **Other Material Flow Objects (PicknPlace Robot, Turntable, Converters)**
- **Hierarchical Modeling & Inheritance of Objects**
- **WorkerPool, Workers and Worker Chart**

### Day 5

- **Introduction to Simtalk**
- **2D Icon Editor / 3D Interface Basics**
- **Bottleneck Analyzer, Sankey Diagramm, Chart and Display objects**
